

Alphabet Sounds Worksheets

Suitable age: Preschool up

Prior knowledge required: None

Format: PDF

Pages: 68

Colour/Black and White: B&W

This file is made up of 68 black and white worksheets. The first 52 worksheets (two for each letter) teach the alphabet sounds and they also provide an opportunity to start teaching the child to read and spell. Space is also provided on these worksheets for the child to practice the correct formation of letters.

The worksheets offer a range of different activities from mazes, colouring-in, drawing, linking to cutting and gluing tasks. With the aim of keeping children interested and entertained.

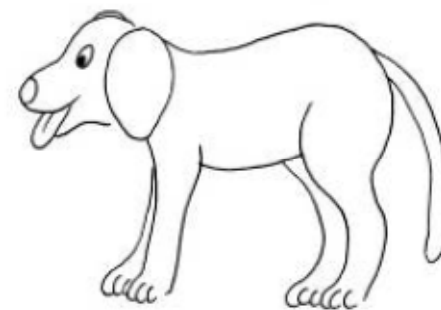

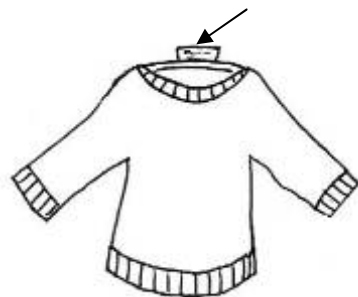

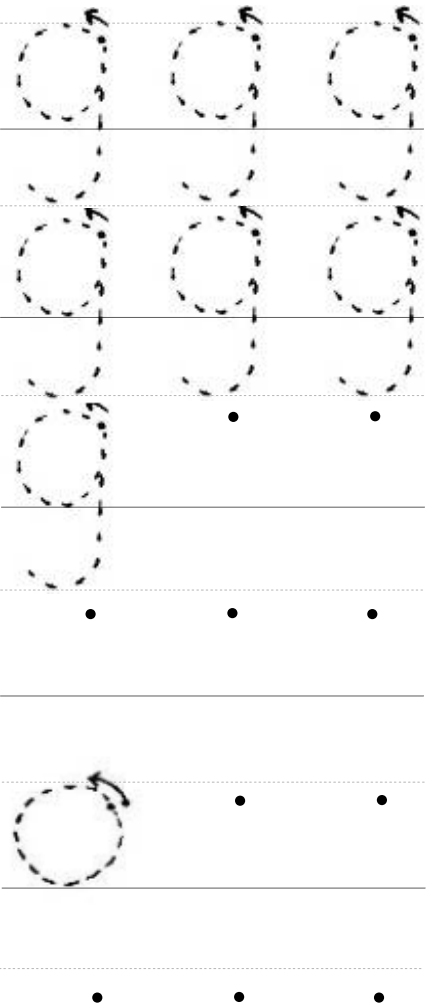

These worksheets have been carefully designed to only introduce one new sound each worksheet and revise sounds learnt in previous worksheets. So for example, on worksheet five the child will be introduced to the sound 'o', but the activities also revise the sounds: 'd', 'a', 'c' and 't'. Sounds which were introduced on worksheets one, two, three and four.

The last 15 worksheets concentrate primarily on words with four sounds e.g. tent, clip. These are a step up from the first 52 worksheets which were designed to teach reading and spelling words with two or three sound words.

A small activity on each page will introduce vowels and three of the worksheets also teach a child when to use 'k' or 'ck' at the end of a word. Full teaching instructions are provided.

Please see the following pages for worksheet examples.
