

# Flipping Cards

**Suitable age:** Preschool up

**Prior knowledge required:** None

**Format:** PDF

**Pages:** 7

**Colour/Black and White:** Colour

This file contains cards focusing on different alphabet sounds. On one side of the card is a letter and on the other an object starting with that sound.

There are 27 cards in all. That is one for each letter of the alphabet plus an alternative sound for the letter 'y' depending on whether you are following the *A Step at a Time* curriculum or not.

The child will be learning to hear the initial sound and also to recognise the symbol representing that sound. Perfect for beginners just learning their alphabet sounds or for parents wishing to raise their child's phonological awareness.

These cards are ideal not only to teach the alphabet sounds, but they can also be used for re-teaching struggling students or for general revision.

Simply place the cards onto a filing ring so the child can flick through them identifying the sounds as they go.
