

Initial Sound Activities - Seven Different Activities

Suitable age: Preschool up

Prior knowledge required: None

Format: PDF

Pages: 11

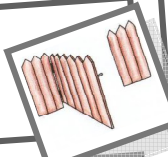

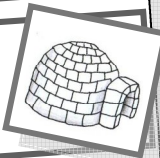

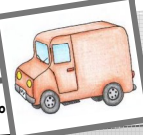

Colour/Black and White: Colour

This resource offers seven interactive activities where the child will be learning to isolate initial sounds. Each activity has interactive pieces.

These activities can be used to raise an awareness of spoken sounds and also to teach the alphabet sounds. Perfect for absolute beginners. Each of these activities are different in order to keep the child's interest.

Student Instructions: The easiest way to play this game is for you to pick one of the object/animal cards and then identify the initial sound you can hear. Find the corresponding letter below and place the card next to it (in the space provided). This game can be made slightly more difficult by starting with identifying the sound for the letter and then searching through the cards until the one with the correct initial sound is found.
